

Fahrrad & Familie

The future belongs to the children. But that also means that the consequences of the climate crisis belong to the children. If we are going to leave them a future like this, let us at least make sure we leave them a bike-friendly city, too. And let us start right away - so that even now children and families can ride their bikes safely, without worries and with joy.

So far, we at the *Fahrrad & Familie* association have limited ourselves to providing service offers: parents and children can try out and rent trailers, cargo bikes, balance bikes and children's bikes from us. But for families to be able to cycle in a relaxed manner, the general conditions have to be right, and that is the infrastructure. For example: sufficiently wide bike lanes without car traffic right next to them, safe sidewalks for the little pedal-knights without parked cars and enough bicycle parking spaces for trailers, cargo bikes and children's seats - and which should be covered, so that the children do not get a wet butt when they sit down after a rainy night.

We want a city where kids and their families can also bike safely.

This is what we stand up for! That is why we as *Fahrrad & Familie* support the Bicycle Referendum, which fights for a better infrastructure via a citizens' petition.

In summer there will be a joint event of *Radentscheid* and *Fahrrad & Familie*: The Kidical Mass, a children's bike demonstration, where children and their families can conquer the city by bike. Mark your calendars for July 11 - Kidical Mass, the children's bike demonstration in Heidelberg, and feel free to talk to me later at the demonstration.

For a better bicycle infrastructure for children and families! So that children can also move safely by bike!
